

# ACCG – Assetto Corsa Career Generator v 0.1

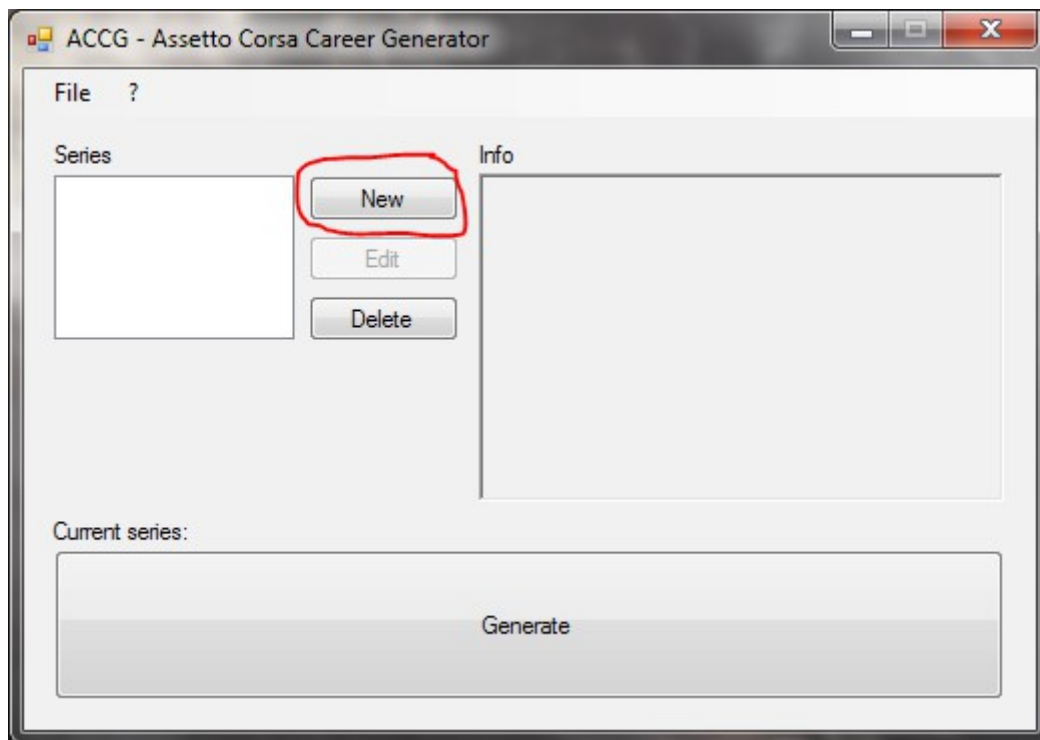

## Short guide

### IMPORTANT!

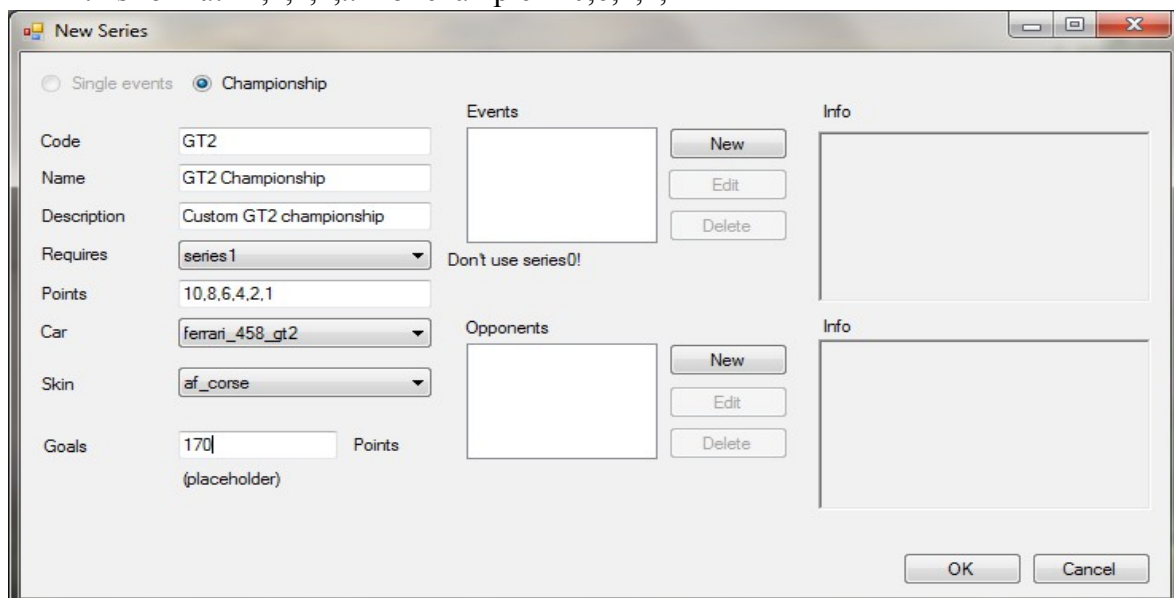

Open the “settings.ini” file in “cfg” sub-folder and be sure the Assetto Corsa path under [AC\_PATH] is correct, if not change it with your right path!

The number under the [SERIES\_GLOBAL\_ID] tag is a start series identifier, means this software will start generate series with “series500” folder and will increment this number.

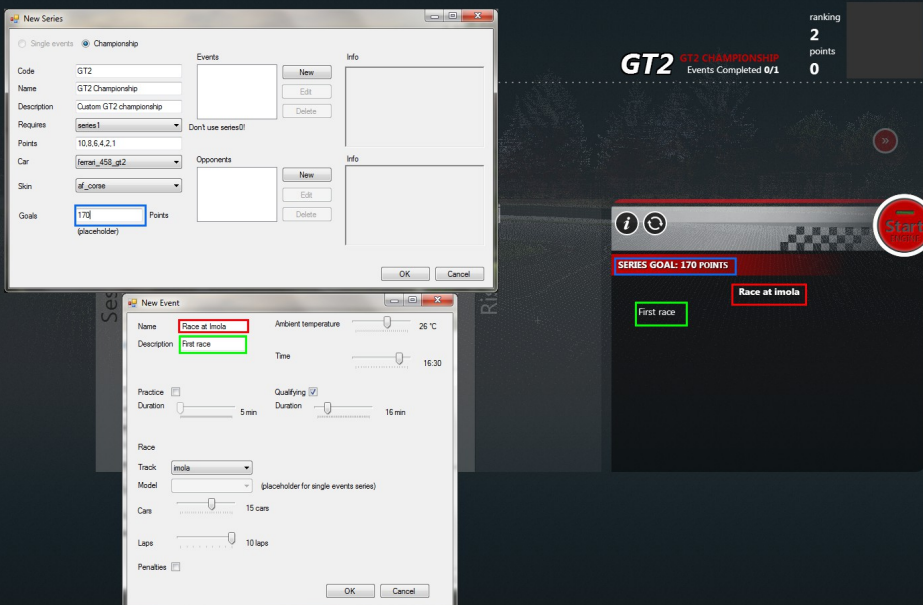

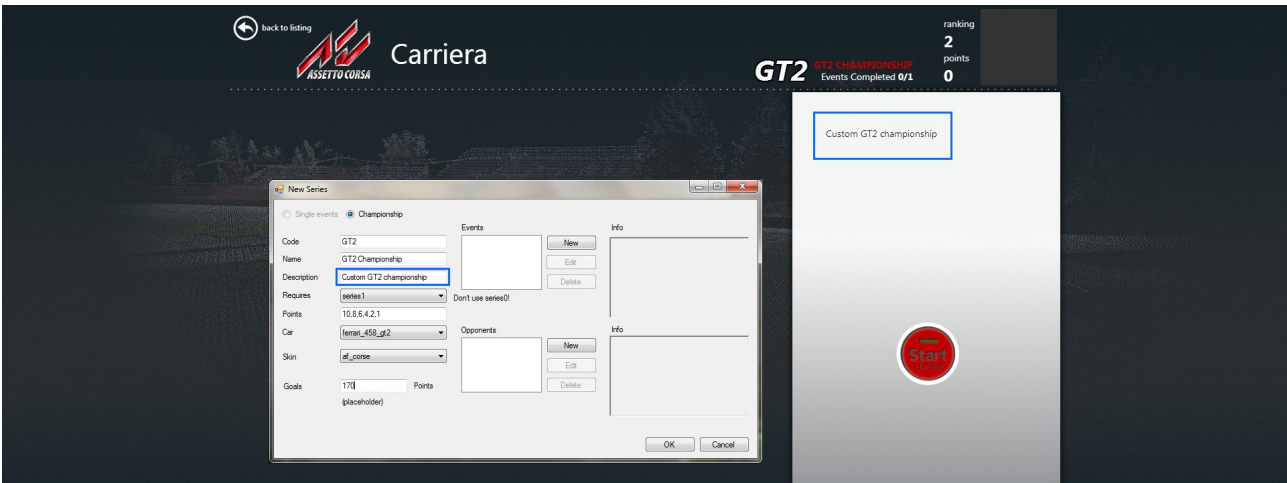

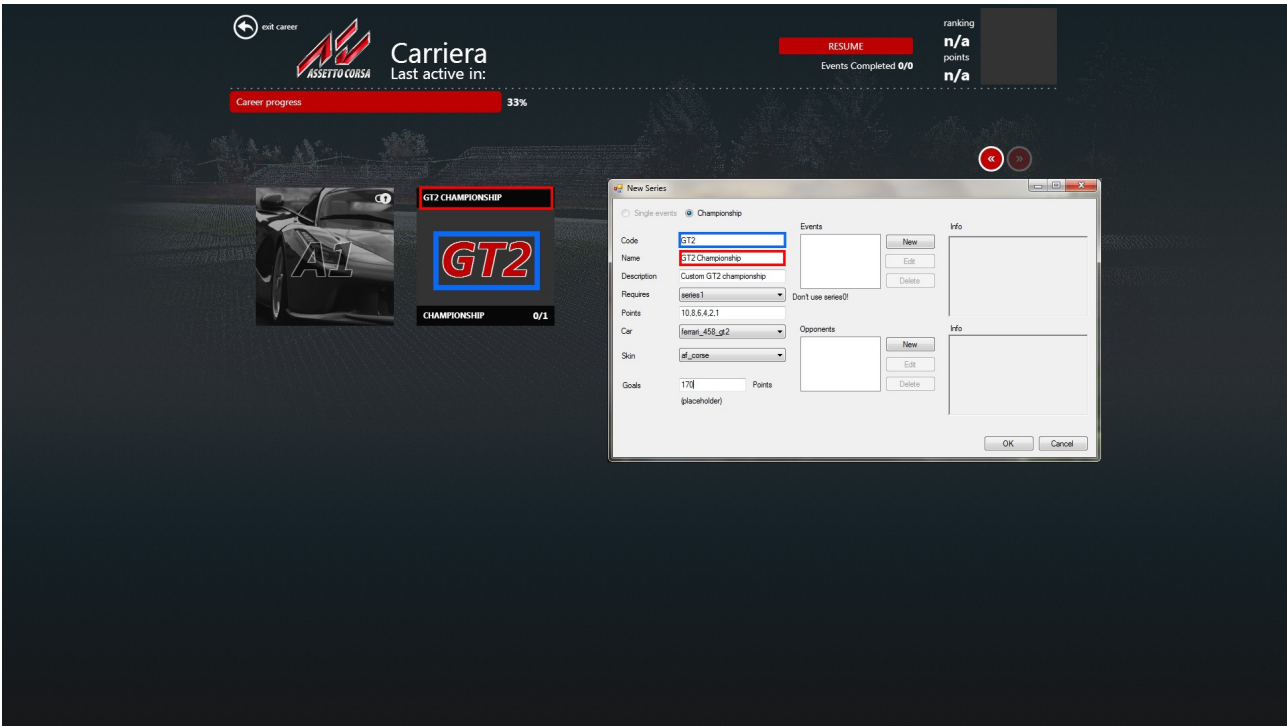

- 1) Click on “New” in the main form

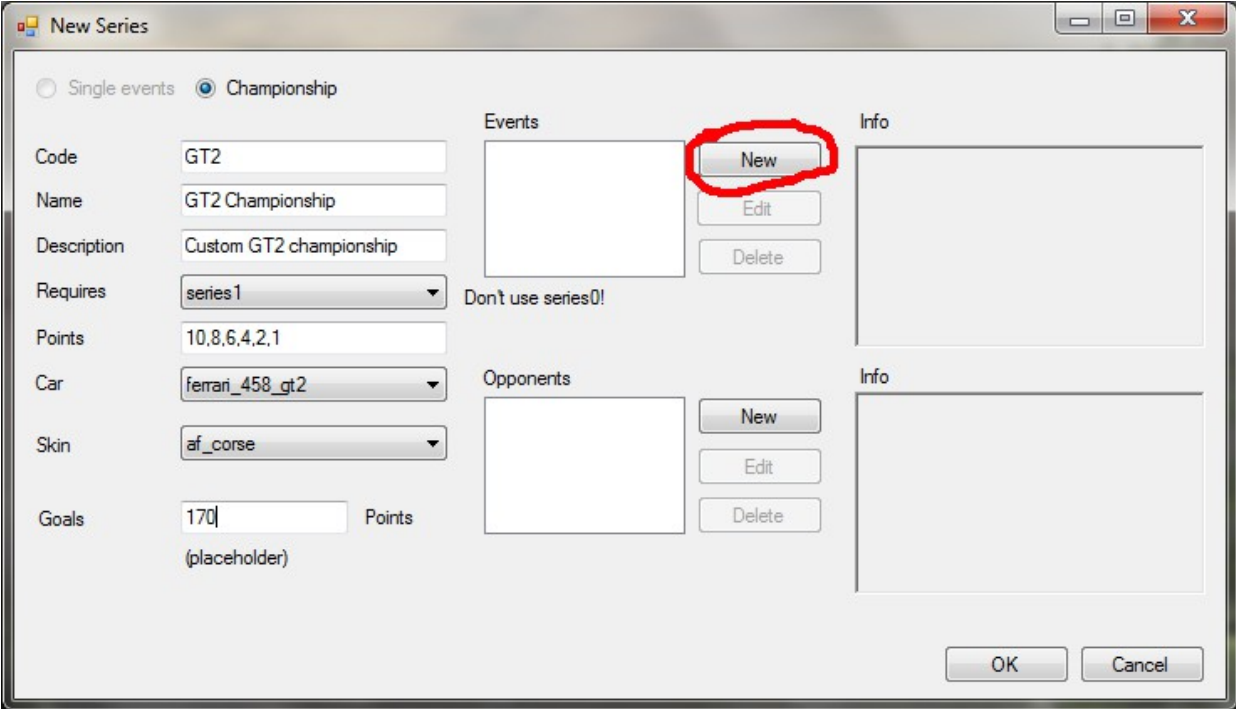

- 2) Fill all the field, but remember, DON'T use “series0” as a requires, and the points need to be in this format “n,n,n,n,..” for example “10,6,4,2,1”

3) Who is who?

#### 4) Create new event

The "New Series" dialog box is shown with the "Championship" tab selected. It contains fields for Code, Name, Description, Requires, Points, Car, Skin, and Goals. The "Events" and "Opponents" lists are empty, and the "Info" sections are also empty. The "New" button in the "Events" list is highlighted with a red circle.

5) Create new opponent

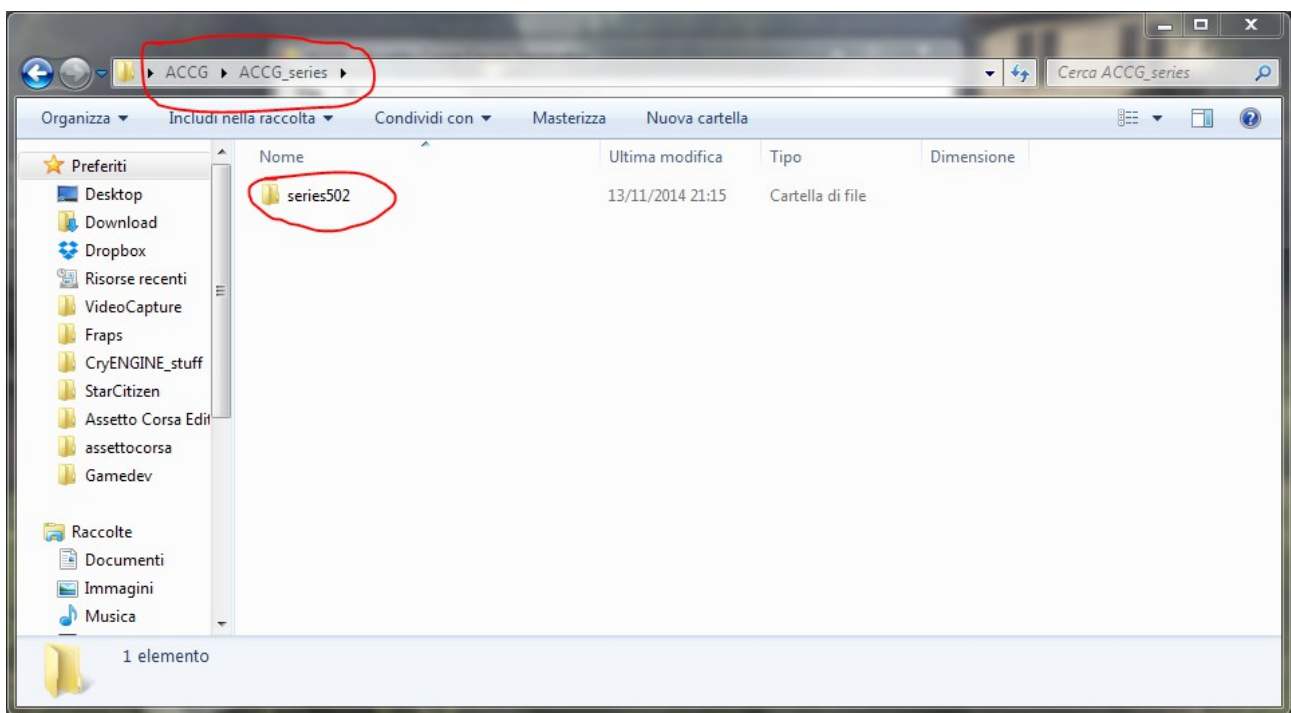

6) Generate series

Before generate your server remember to create all your events and opponent, this software don't permit the editing of a series (not yet).

Select the series you want to generate and click the big “Generate” button.

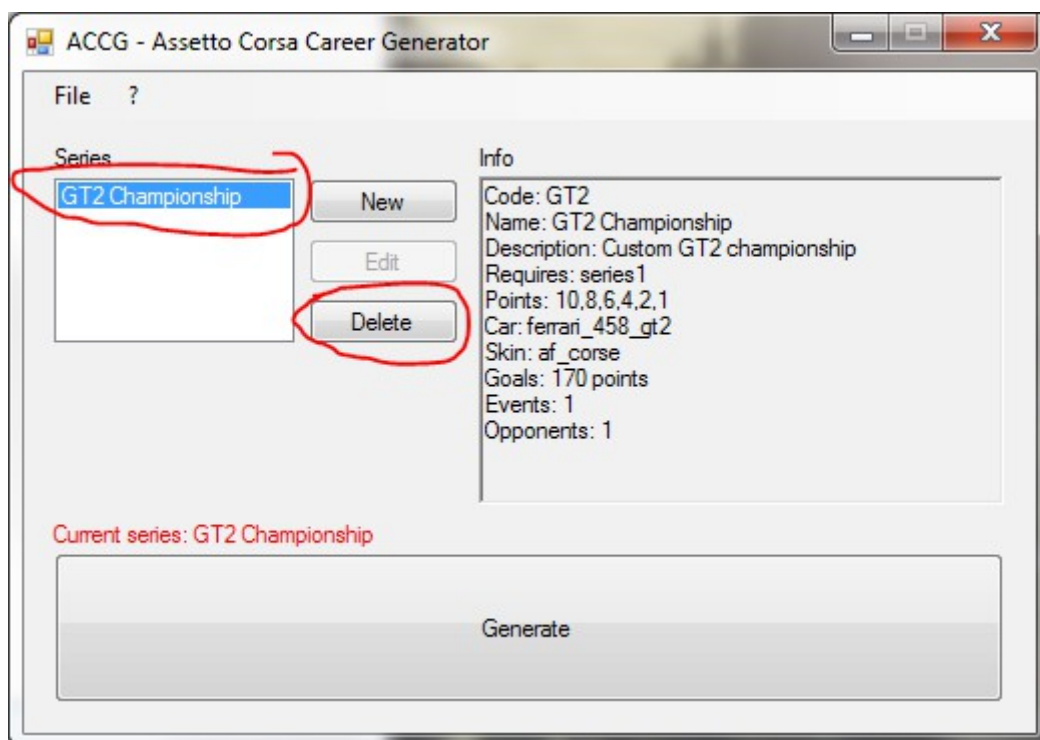

Your series will be created in the “ACCG\_series” sub-folder

now you can copy your series folder in your  
Steam\SteamApps\common\assetto corsa\content\career folder

#### 7) Delete a series

This operation will delete the folder, subfolders and files of the selected series

P.S. The delete event and delete opponent buttons works in the same way.
